Types of Portfolio Management Strategies

An actively managed investment fund is a fund in which a manager or a management team makes decisions about how to invest the fund's money. A passively managed fund, by contrast, simply follows a market index. It does not have a management team making investment decisions. 1 You'll often hear the term " actively managed fund " in relation to a mutual fund, although there are also actively managed ETFs (exchange-traded funds).

Actively vs. Passively Managed Funds

The choice of using active management or passive management is not an "either/or" (binary) alternative but rather a decision involving a passive-active spectrum. Investors may decide to position their portfolios across the passive-active spectrum based on their confidence to outperform, client preference, suitable benchmarks, client-specific mandates, risks/costs of active management, and taxes.

Overview of Equity Portfolio Management

Active equity investing is based on the concept that a skilled portfolio manager can both identify and differentiate between the most attractive securities and the least attractive securities—typically relative to a pre-specified benchmark. If this is the case, why is a portfolio—a collection of securities—even necessary?
