If the back of your phone is getting hot, the problem may be an overheating battery. Most modern mobile phones use Li-Ion (lithium-ion) batteries that, despite their size, pack a powerful punch. Li-Ion batteries are generally safe, but malfunctions do sometimes occur. A hot battery could also be in need of replacement.

Headache, confusion, dizziness, or nausea could be a sign of a heat-related illness. Go to the doctor or an emergency room to find out if you need treatment. To keep heat-related illnesses from becoming a dangerous heat stroke, remember to: Get out of the sun and into a cool place—air-conditioning is best.

sometimes from the
sides of the case.

11 Best Ways to Keep Your Computer Cool - Lifewire

if you can't stand the heat, get out of the kitchen If the pressure or stress is too great, leave or give up. For example, It'll take a lot of weekend overtime to finish, so if you can't stand the heat, get out of the kitchen. This folksy adage has been

File Type PDF As Hot It Gets Out Of Uniform 10 File Kennedy

ascribed to President Harry S. Truman, who certainly said it and may have originated it.

If you can't stand the heat, get out of the kitchen ...

Even if it doesn't give out, over-inflation can cause a tire to prematurely wear and interfere with braking. There are three things at play when the heat causes air pressure to build: Hot Molecules All

File Type PDF As Hot It Gets Out Of Uniform 10 Elle Kennedy

materials are made up of atoms and molecules. When molecules get hot they start to vibrate intensely. The vibration causes expansion.
