Atmel Studio 7 - Microchip Technology

Atmel Studio 7 - Microchip Technology

Because the chip arrives in a blank state, we need to download the Atmel Studio 7 application to a laptop, and then write a program in C to blink a test LED on the circuit board. Additionally, we will use a hardware programming device to perform In-System Programming (ISP) on the chip. For now, today's objectives are simple: Download Atmel Studio 7

Programming AVR Microcontrollers with Atmel Studio 7 ...

An Arduino Compatible Edit, Build and Deployment tool. Works with or without Arduino.ino files. With or without Arduino IDE. Supports all Arduino.cc versions from 1.0 to 1.8.x (+1.9 beta), Atmel Boards, Microchip chipKIT etc. Code optionally remains compatible with the Arduino IDE. Contains many additional features such as intelligent cache, parallel builds, usb/serial/rf/bluetooth debugger ...
