As long as you look at things this way, the chances of you getting started to write a book is slim to none. The solution to this is to break the task of writing a book into smaller, more achievable pieces. Break down the book into a series of chapters. Then break those chapters down into a series of paragraphs.

The bulk of the methods covered can be found in a good statistics textbook and the book has plenty of illustrations and lucid explanations on using these techniques. The major highlight of the book is the "story telling" the author has adopted. This is sorely missing in many of the texts on data science and predictive models.
