Credit risk analysis can be thought of as an extension of the credit allocation process. After an individual or business applies to a bank or financial institution for a loan, the lending institution analyzes the potential benefits and costs associated with the loan. Credit risk analysis is used to estimate the costs associated with the loan.

## **Credit Risk Analysis - Overview, Types of Credit Risk**

In layman terms, Credit analysis is more about the identification of risks in situations where a potential for lending is observed by the Banks. Both quantitative and qualitative assessment forms a part of the overall appraisal of the clients (company/individual).

Credit analysis. Credit Analysis Credit analysis is the process of determining the ability of a company or person to repay their debt obligations. In other words, it is a process that determines a potential borrower's credit risk or default risk. It incorporates both qualitative and quantitative factors.
