Interpretation

Objectives At the completion of this course the learner will be able to: 1. Identify the sequence of normal electrical activation of the heart. 2. Describe the physiology of cardiac muscle contraction. 3. Given a rhythm strip, identify Sinus, Atrial, Junctional and Ventricular dysrhythmias, and Atrioventricular Blocks. 4.

Basic ECG Rhythm Interpretation - RN.com

An EKG uses electrodes attached to the skin to detect electric current moving through the heart. These signals are transmitted to produce a record of cardiac activity.

Arrhythmia or dysrhythmia are disturbances in the normal cardiac rhythm of the heart which
