### Lionel ZW Transformer 275 Watt | eBay

The Lionel ZW is Lionel's most iconic transformer of the 1950s and 1960s, and perhaps one of its most iconic products, period. Everyone wanted the two-handled, football-shaped, 275-watt powerhouse that was the ZW. It was one of Lionel's more venerable postwar products, lasting on the market for 18 years from 1948 to 1966.

### All about the Lionel ZW - The Silicon Underground

The most popular transformer built by Lionel, by far, is the 275 watt ZW. It provides a combination of power, flexibility, whistle control, multiple train operation, direction control, and (this is very important) the user has an inherent understanding of how to control the trains.

### Lionel ZW service manual - Classic Toy Trains Magazine

The Type R is clearly datable to 1961 by the service manual pages (the date is on some reproductions, though not Greenberg's) and the instruction sheet ZW-251 (dated 1-61). The riveted laminations came long before that, but not all ZWs with riveted laminations are Type Rs; those had further changes, and the use of 18V pilot lights and short ...

### Lionel Postwar ZW Transformer 275 Watt | eBay

Lionel transformers are about 80% efficient, which means the other 20% comes off as heat. A 275 watt transformer Could give off about 60 watts of heat. I recommend that circuit breakers be added to each of the output terminals so you do not have to worry about overloads or short circuits that the transformer's own circuit breaker does not catch.
