Let's understand the

# Read PDF Memory Flashes Manual Guide

difference between TTL and Manual Flash: TTL - The flash takes a reading and makes its best guess. The flash fires a pre-flash, which takes a measurement of the light reading, and then fires the flash at the power level that it thinks will properly expose the image. The biggest pro is that it's automated and does the thinking for you, but it comes with a whole list of cons which

# Read PDF Memory Flashes Manual Guide

is why we prefer manually controlling our flash.
