Carburetor Size. Carburetor size, usually measured by the width of the venturi at its smallest point, has a significant effect on the power, fuel economy, and noise level of an engine. Most stock mopeds came equipped with anywhere from a 9mm to 15mm carburetor.

### **Carburetor - Moped Wiki**

Here's a QT50 carburetor that I labeled. This carb is actually a knock-off carb but is pretty much an exact reproduction of the stock carb. Some of the older stock carbs have the pilot air screw
