PLS-CADD runs under Microsoft Windows and features an easy to use graphical user interface. It integrates all aspects of line design into a single stand-alone program with a simple, logical, consistent interface. No other program can match the sophisticated engineering capabilities available in PLS-CADD.

PLS-CADD Page, English Version

You may want to first run your system with pi sections (with manual entry of RXB from the loadflow) and then switch to the fre-dep phase domain model later. - The PSS/E program assumes all RXB data is long-line corrected (as it uses it directly in a PI section formulation in its Y matrix).
