The ladder of inference has been an incredible tool to help Warren walk students through their thinking, modeling the tool step by step, climbing up or down the ladder as students offer insights from the text. "It was such a simple and elegant way to allow someone who couldn't wrap their head around inferring to do it well,"

tools fall under several broad categories: brainstorming tools, dynamic thinking tools, structural thinking tools, and computer based tools. Although each tool is designed to stand alone, they also build on one another and can be used in combination to achieve deeper insights into dynamic behavior.

Palette of Systems

**Thinking Tools - The
Systems Thinker**

Here's a definition from
Barry Richmond, who
coined the term in

1987: 1 Systems

Thinking is the art and
science of making
reliable inferences
about behavior by
developing an
increasingly deep
understanding of
underlying structure..
Cultivating this "art
and science" leads to
routine use of correct
